As vehicle programs move from current production to a service and support phase, powertrain assembly can be transitioned to AM General/GEP to meet ongoing service or secondary market demands. This allows our customers' powertrain assembly plants to focus on current programs without the complexity of low volume service requirements.

Our wholly owned subsidiary, General Engine Products (GEP), located in Franklin, Ohio, produces the OPTIMIZER 6500 V-8 diesel engine and the 4L80E/4L85E transmissions found in new/existing HMMWVs, as a service replacement engine for numerous vehicles, and marine applications.

SERVICES INCLUDE:

- Assembly of 6.5L Optimizer Diesel, 4L80E and 4L85E transmissions
- Service support, build, kitting, and components
- Special models (upfit/conversions)
- Capability to assemble your engine/transmission for current production or for outgoing powertrains in support of service

Regardless of volume or the type of services your company needs, we have the capability and flexibility to support the entire value chain.

AM GENERAL IS YOUR POWERTRAIN ASSEMBLY SOLUTION
