

REGIS LUTHER

Sr. Vice President, Engineering and Chief Technology Officer

As Senior Vice President, Engineering and Chief Technology Officer, Regis Luther leads the company's product development and technology integration efforts.

In this role, Luther reports to AM General President and CEO, James Cannon and works closely with our executive management team in a broad array of product development initiatives that further enhance AM General's position as a global manufacturing leader of specialty vehicles and platforms for military and commercial customers. Identifying market trends, competitor positioning and key technology applications, either through in-house development or strategic partnerships, for the company's product portfolio are some key objectives that Luther oversees.

Luther joined AM General following an extensive and successful engineering career. Prior to AM General, he was president and owner of his own management and engineering consulting firm which included clients from Fortune 500 companies in the Defense, Electronics, and Automotive industries. He also served as Vice President, Defense Engineering, Portfolio Planning and Program Management at Navistar International Inc. Before joining Navistar International Inc., Luther worked at BAE Systems as Vice President, Business Unit Manager, Light Tactical Vehicles.

Luther holds an MBA from the University of Houston, a Master of Chemical Engineering from Johns Hopkins University, and a Bachelor's degree in Engineering from Youngstown State University. Luther currently serves as a board member on Windings Inc. Luther's prior and current board positions include Defense Automotive Manufactures Consortium, Army Science Board, and Transportation Advisory Council at Northwestern University.
