

Marshall Land Systems to Become Authorised Service Provider for HUMVEE – Strengthening Partnership with AM General

Paris, France, June 17, 2026 – AM General, leading global military mobility solutions provider, and Marshall Land Systems, a UK-headquartered company specialising in the design, manufacture and support of robust deployable infrastructure and platform-integrated capabilities, has signed a Memorandum of Understanding (MOU) at Eurosatory to certify Marshall Land Systems as an Authorised Service Provider of AM General’s HUMVEE Platform. This comes as the two companies have formally partnered to support the IRONCLAD Team efforts in pursuit of the UK Ministry of Defence (MoD) Light Mobility Vehicle (LMV) Programme.

“We couldn’t be more excited to make Marshall Land Systems an Authorised Service Provider for the HUMVEE platform,” said John Chadbourne, AM General President and CEO. “This addition to our partnership is a testament to the strong relationship we have built with Marshall Land Systems and our confidence in their ability to provide world class service in support of our product offering for the LMV Programme. This will position Marshall Land Systems with the ability to provide those same services to NATO HUMVEE users in the European Region.”

AM General Authorised Service Providers provide full lifecycle support to worldwide customers including trouble shooting and diagnostics, parts service, and maintenance support for the HUMVEE platform. Currently there are over 350,000 HUMVEE vehicles deployed worldwide, with 17 NATO users in Europe as well as multiple countries globally. This training will provide Marshall Land Systems with the ability to provide through-life support for the HUMVEE platform fielded by the UK MoD.

“We’re delighted to partner with AM General, a globally recognised brand with a fleet of hundreds of thousands of vehicles operating worldwide,” said Gareth Williams, Marshall Land Systems CEO. “This continued partnership reinforces the strong relationship between our two organisations, enabling us to grow our capabilities in the UK, Europe and beyond. We’re optimistic about what the future holds and the potential we can achieve together.”

The IRONCLAD Team, currently comprising AM General and Marshall Land Systems, is currently pursuing the UK LMV programme solicitation and continues to grow. AM General’s HUMVEE is a battle-proven, light weight, purpose-built military platform that provides modularity to perform multiple mission sets on the same common chassis. Marshall Land Systems is a global leader in supporting NATO and their allies with deployable and mission critical infrastructure, integrated platform solutions, and managed support services. IRONCLAD is working to provide next generation of light tactical vehicles for the UK MOD.

About AM General

AM General engineers, manufactures, and supports specialized vehicles for military and commercial customers. Its global presence of diverse product offerings in over 70 countries uniquely positions AM General to enhance interoperability across allies and build on its long-standing defence industry and automotive partnerships. AM General’s innovative spirit delivers

advanced, rugged, resilient, and dependable mobility solutions that will move you. With a well-rounded product portfolio that includes the iconic HUMVEE vehicles, Joint Light Tactical Vehicle A2 (JLTV A2), and the revolutionary soft recoil technology for mobile platforms, AM General strives to offer continuous improvement that is ready now. About Marshall Land Systems

Marshall Land Systems is a Canadian-owned global company with a legacy of British engineering excellence. Founded in Cambridge, UK, the company has spent more than a century driving innovation and delivering pioneering advances ranging from the nose of Concorde to early hydrogen fuel cell technology that ultimately contributed to the success of the moon landings. Today, Marshall Land Systems designs, develops, delivers, and supports specialist vehicles, systems, and infrastructure for NATO forces worldwide.

From bomb disposal vehicles and deployable shelters to command-and-control capabilities and battlefield CT scanners, Marshall Land Systems helps protect people in critical situations through exceptional engineering expertise. The company has major facilities in the UK, Canada, and the Netherlands. For more information visit <https://marshallandsystems.com>.
